

DHRUVI MISTRY

Full-Stack AI Engineer — Next.js / React / TypeScript · Python (FastAPI, Django) · AI & LLM Applications

dhruvim433@gmail.com | [LinkedIn](#) | [GitHub](#) | Gujarat, India

PROFESSIONAL SUMMARY

Full-stack engineer with 1+ year at an AI consultancy, delivering production web applications for client engagements end to end — Next.js 16 / React 19 / TypeScript on the front end, FastAPI and Django REST on the back end, PostgreSQL for data. Ship LLM features against Anthropic Claude and OpenAI, including FAISS-backed RAG retrieval, tool-calling agents, streaming responses and token-cost instrumentation.

SKILLS

- **Languages:** TypeScript, Python, JavaScript, SQL, HTML/CSS
- **Frontend:** Next.js 16 (App Router), React 19, Tailwind CSS v4, SWR, Redux Toolkit, shadcn/ui, React Hook Form, Zod, Vitest
- **Backend:** FastAPI, Django, Django REST Framework, SQLAlchemy 2.0, Pydantic v2, Alembic, REST API design, OpenAPI, JWT / SimpleJWT
- **AI / LLM:** Anthropic Claude API, OpenAI API, RAG, FAISS vector search, embeddings, tool/function calling, SSE streaming, Model Context Protocol (MCP), prompt engineering, LLM evaluation harnesses
- **Cloud & Auth:** Azure Blob Storage, Cloudflare R2 (S3-compatible), Microsoft Entra ID SSO, Auth.js v5 / NextAuth, OAuth 2.0, Microsoft Graph API, Azure Communication Services, Firebase
- **Practices:** Backend-for-Frontend architecture, object-level authorization, database migrations, unit testing, code review, Git/GitHub, Docker, CI (GitHub Actions), Celery, Sentry

EXPERIENCE

Pragnakalp Techlabs | Junior Software Developer | Jun 2025 – Present

Software Trainee (Jun–Dec 2025) → Junior Software Developer (Dec 2025 – Present)

- Deliver full-stack and AI features for client products across web, LLM and document-processing domains.

AI Document Review Platform · US healthcare-SaaS client · Sept 2025 – Present

- Built and delivered full-stack features using Next.js, React, TypeScript, FastAPI, SQLAlchemy, and PostgreSQL, working across database schemas, REST APIs, BFF routes, and responsive user interfaces.
- Designed and enhanced RAG and agentic retrieval workflows using LLM tool calling, vector search, and context management, reducing agentic context per search by 73%.
- Developed LLM-powered conversational experiences with conversation history, SSE streaming, reasoning-model support, and per-request token usage tracking.
- Implemented role-based and object-level authorization, ensuring users can access only the resources permitted for their account.
- Integrated Microsoft Entra ID SSO using Auth.js and a stateless BFF architecture, centralizing token management and keeping access tokens out of the browser.
- Migrated application data from a legacy database to PostgreSQL, establishing an Alembic schema baseline and updating application-level data access.
- Implemented cloud object storage using Cloudflare R2 and Azure Blob Storage for documents and generated artifacts.
- Developed secure machine-to-machine REST APIs using API-key authentication for external data ingestion.
- Improved application security by redacting sensitive information from logs and implementing expiring access links for protected documents.
- Improved frontend performance through table virtualization and state management optimization, reducing unnecessary re-renders and improving responsiveness across desktop, tablet, and mobile.
- Built interactive PDF and DICOM document viewers with citation-based navigation for easier access to referenced information.
- Developed and maintained unit tests using Vitest and pytest, while following strict TypeScript and ESLint quality checks.

Learning Platform · Client engagement · Jul 2025 — front-end

- Built a React + Vite front end using Redux Toolkit for state, Firebase, Chart.js dashboards and Framer Motion transitions.

PROJECTS

Online Bookstore — Django REST Framework · Next.js 15 · shadcn/ui

- Designed REST APIs and data models in Django REST Framework with SimpleJWT email/password authentication.
- Built the storefront in Next.js 15 with shadcn/ui, React Hook Form and Zod validation, protecting routes with Next.js middleware.
- Implemented the full cart and checkout flow across both tiers — cart models, order placement, and inventory quantity handling.

Claude MCP CLI Agent — Python · Anthropic Claude API · Model Context Protocol

- Built a command-line AI agent through Anthropic's engineering courses, implementing an MCP client and MCP server with custom tool definitions and a multi-turn chat loop.

EARLIER EXPERIENCE

Wappzo Infotech Pvt. Ltd. | Front-End Developer Intern | Jan 2025 – Apr 2025

- Built an NGO–volunteer matching platform in Figma, React.js, TypeScript and Bootstrap.
- Implemented registration, login authentication and event application flows against REST APIs.

CodeSpeedy Technologies Pvt. Ltd. | Web Developer Intern / *Jun 2024 – Jul 2024*

- Built a login page UI with unique password visibility toggle and drag-and-drop file upload components in vanilla JavaScript.

EDUCATION

B.E., Information Technology — Sardar Vallabhbhai Patel Institute of Technology, Vasad
2021–2025 · CGPA 8.65

CERTIFICATIONS

- Anthropic — AI Fluency / Prompt Engineering & Claude API coursework
- Code Unnati Program — Edunet Foundation & SAP (Data Science, ML, AI, IoT)
